Delbert Tesar
The University of Texas, Austin
Austin, TX, USA**

Presentation (15 minutes)

By

**Pramod Khargonekar
University of California
Irvine, CA, USA**

Professor R. E. Kalman: Reminiscences and Reflections

ABSTRACT: A former doctoral student of late Professor R. E. Kalman, the speaker will share his personal experiences of his studies under the guidance of the legendary founding figure in the field of modern systems and control theory. He will describe how he got the opportunity of becoming Professor Kalman's student; the intellectual environment at the Center for Mathematical System Theory at the University of Florida; and how those early experiences molded his future professional growth. He will also share some reflections on Professor Kalman's thought processes, intellectual values, and views of science, engineering, and broader human concerns.

Q/A and open discussions (15 minutes)
