Call for Papers for the 11th International Symposium on Robotics and Applications (ISORA 2006)

The organizing Committee is pleased to invite you to submit papers to and attend the international World Automation Congress 2006 in Budapest, Hungary, July 24-27, 2006. ISORA – the 11th International Symposium on Robotics and Applications aims to bring together scientists, engineers, developers, and researchers of robotics and their applications. By providing a number of themed tracks (both research themes and application areas), the Program Committee has attempted to provide a forum for scientific contributions. Please see the World Automation Congress website <http://wacong.org/> for programmatic details and note that the deadline for special session and regular paper submissions is **December 1, 2005**.

Topics: Papers on research, practical, and theoretical aspects of robotics and their applications include but are not limited to industrial and non-industrial robot applications, automation applications, manufacturing and applied robotics, mechanics of robots, robotic mechanisms, manipulation, multi-robots, robot control, learning and education, grasping, autonomous vehicles, actuators and sensing for robotics, machine vision, man-machine interfaces, mechatronics, simulation, humanoid robotics and other research topics in robotics.
